Alex was very responsive to my training needs for Luna, my 2 year old Goldendoodle. The techniques he taught me to use have been very effective. He was on time for our sessions and always professional. Luna and I both worked well and benefited from Alex's training.

Having Alex train me to train our very strong willed lab was a treat. Our dog is now doing much better now, compared to before. Alex also brought other dogs to play with our lab to burn off excess energy. This all made a huge difference within our household.

Alex came to train my dog that had started growling and snapping and nipping at anyone who came near my wife, including my daughter! He corrected that behavior in under an hour and taught us all how to quickly train her to stop that and other bad behaviors.

My Husband Michael Lytle and I just loved the way Alex trained our alpha male corgi! He is very patient w/ stubborn doggies, like ours was and very kind. Alex, is also honest, open minded and good natured.

I used Alex the Dog Trainer for my two Pomeranian puppies. Alex went with me to Petco to help pick out a pen for my dogs and he set it up in my house along with numerous pointers on how to housebreak my dogs. My puppies have made great progress.

I think Alex is great. My dogs were barking when Alex came in. He got them adjusted not to bark for him or anyone else. He also showed me how to train them to go on the newspaper. After a few visits my dogs behaved much better.

Emily Frick

Alex came to help me train my Miniature Poodle puppy. He was most helpful, going out of his way to get us started on housebreaking and good behavior! I look forward to future sessions with him.

We had a very strong mixed breed dog that was a leash puller. Alex had the know-how and the means to teach my husband and I the importance of the heel command.

Elieen Feinman

Alex took the needed time on the phone and at our house in order to solve our problematic and chronic barker.

My normally well behaved Doberman Pinscher, Atlas, began to show aggression to other dogs, after having had another dog at the park attack him..Alex bonded and established his authority firmly but gently with my dog at our very first appointment...He has been working with both me and Atlas, on a regular basis which was vital...I needed to know how my actions and energy might be affecting Atlas...And they were! I'm starting to feel more confident and calmer, which has in turn, impacted on Atlas...He barely acknowledges that we are passing another dog...
